

Daniel Schindler – Biosketch, August 2016

Daniel Schindler is the Harriet Bullitt Endowed Chair of Conservation in the School of Aquatic and Fishery Sciences at the University of Washington. Most of his research focuses on understanding the functioning of watersheds that support Pacific salmon in western Alaska, and the dynamics of fisheries that operate in these ecosystems. He is a principal investigator of the UW-Alaska Salmon Program that has studied salmon ecosystems in Alaska since the 1940s, and he spends several months of the year in the field in the Bristol Bay region. Schindler has been a recipient of the Distinguished Research Award from the UW College of Ocean and Fishery Sciences, the Carl R. Sullivan Fishery Conservation Award that was awarded to the UW-Alaska Salmon Program from the American Fisheries Society in 2012, and the Frank Rigler Award from the Canadian Society of Limnologists in 2015. He has provided service to a wide variety of governmental and non-governmental organizations, and serves on the editorial board of the journals *Ecology*, *Ecosystems*, *Climate Change Responses*, and *Facets*. He earned a B.Sc. with Honours from the University of British Columbia (1990), and a M.S. (1992) and Ph. D. (1995) from the University of Wisconsin-Madison. He was hired onto the faculty at the University of Washington in 1997 and teaches undergraduate and graduate students in Limnology, Aquatic Sciences, and Ecology.
