

2018 Streambank Rehabilitation Workshops

Soldotna	May 15 th & 16 th
Wasilla	May 30 th & 31 st
Fairbanks	August 8 th & 9 th

The first day of this workshop will be in the classroom and presents information on techniques for rehabilitating and restoring riparian habitat including: construction and plant materials, hydraulics, salmon habitat, construction techniques and case histories. On the second day we will install a shoreline revegetation project with workshop participants utilizing techniques discussed in the class.

- Be prepared to be outside both days. The first day will mostly be inside and the second will be outside all day.
 - Hip, knee boots or waders
 - Warm clothes – recommend layers
 - Rain gear
 - Work gloves

- Lunch – Please bring a packed lunch to eat on site both days.
